

ETL Suite for Temenos T24™

 Lera Technologies

Do you need to retrieve your Temenos T24™ data?

Can you schedule your data extractions?

Like to perform data analysis and generate attractive reports?

Are you keen in building a data warehouse without pain?

Interested in having all your Temenos T24™ data in one central place along with your corporate data?

EXTRACTION TOOL FOR Temenos T24™ - NEED

Temenos T24™ is one of the most versatile banking systems ever made. As a result, generating complex reports require more resources which make the entire process tedious and time consuming. An ETL tool makes the job easier to create complex reports. It helps in creating user friendly reports for the management and the decision makers.

Easy to perform Data Analysis & Report Generation.

OUR SOLUTION

Eficaz™ – A solution for all your needs. It is a powerful and cost effective web based ETL Suite – It allows you to extract, transform & load all your Temenos T24™ data quickly and automatically. There is no need for human interaction. It does the job for you.

Eficaz™ is time tested and can be easily integrated into a Temenos T24™ environment. Eficaz has a feature to decouple the reporting activities from the core banking system which saves lot of operational hours.

Few key features of Eficaz™ that makes it stand apart:

- Quick access to Temenos T24™ applications
- Extracts millions of records and normalizes them with extraordinary speed without impacting the performance of the System
- Extract the data in parallel sessions with an ability to roll-over into multiple files based on the configuration
- Incremental extractions based on T24 Concat Files without needing to create Indexes
- Boosts productivity using configurable filter conditions and provides normalized/de-normalized output as needed
- Transform the extracted data by performing data cleansing while ensuring the data integrity of the actual data
- Load the transformed data automatically to a data mart using "Bulk Copy Function" in Eficaz
- It is 300% faster and efficient compared to traditional ETL tools

... to solve the common problems.

BENEFITS

Eficaz™ is the ideal solution for building a data warehouse whereby you can gather all your Temenos T24™ data into one central place. “Reporting” and “MIS solution setup” becomes extremely easy since you have one central location from where you can get (normalize) your data and new sophisticated calculations can be performed. **Eficaz™** interacts with any type of RDBMS like Oracle™, MS SQL Server™, MS Access™, etc.

POWER

Eficaz™ is an extremely powerful tool that extracts millions of records and normalizes them with extraordinary speed. Knowing that it does not affect the performance of the Temenos T24™ server, you will be astonished by its processing speed. Besides it saves you time, effort and money since you do not have to write any line of code to perform data extractions.

FLEXIBILITY

Eficaz™ along with third party standard tools (such as Business Objects™, Crystal Reports™, MS Office™, etc...) allows the users to go beyond the possibilities offered by the built-in reports and Temenos T24™ enquiries features. Hence, they will be able to perform dynamic data analysis, using multiple selection criteria and using standard tools to perform the rendering, publishing and distribution of the reports.

SELF CUSTOMISATION FACILITIES

Eficaz™ Self customization feature allows you to extract data even when your TemenosT24™ implementation has undergone changes / customization / upgrade. All you need to do in **Eficaz™** is to create / update definitions to process the new / changed table structure.

SECURITY GRANT

Security feature in **Eficaz™** allows only authorized personnel with permissions to perform actions like Customize, View, Add, Edit and Delete etc. The Changes have to be followed and Integrated manually as a request to the existing users of this Tool. It makes **Eficaz™** a complete Extraction-Transform-Load tool you can rely on.

UNIQUENESS

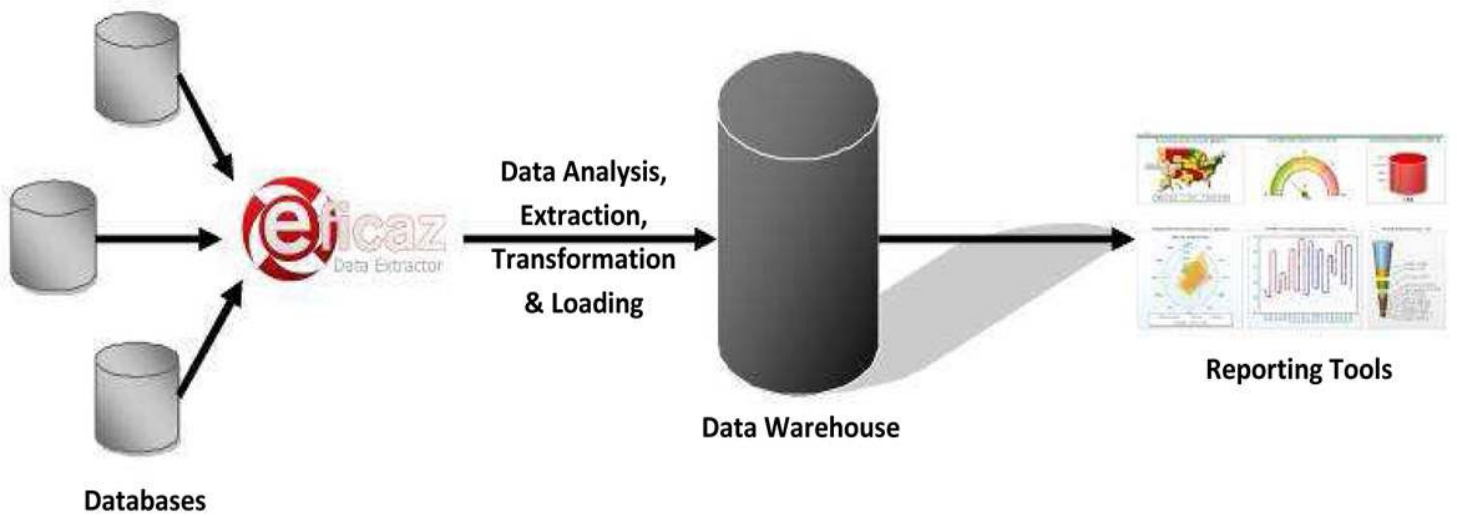

Eficaz™ is the integrated tool that allows you to select, normalize and extract data in a fast and secure way from any Temenos T24™ tables. **Eficaz™** is so unique that it automatically takes care of all multi-values, sub-values, descriptors and your LOCAL REFS.

INTEGRATION

Eficaz™ is the gateway, the bridge, the interface between your Temenos T24™ system and your analysis tools. With **Eficaz™**, extractions can be automatically started at any time (usually during the night), without any human interaction.

“Our expertise in Temenos T24™ coupled with know-how in the Latest Technology field allows us to cover all stages of solution including Temenos T24™ external data extraction, transformation, data analysis, data warehouse loading, reporting generation and distribution.”
